GREENUMBRELLA®

# CleanMaintain w/SlipResist

## CLARIFY & REINFORCE

Green Umbrella® CleanMaintain w/Slip-Resist™ is a necessary treatment for the sustainability of architectural concrete. A subsurface, residue-free floor cleaner working equally as a surface conditioner for slip resistance. GUnanoInside™ reinforces the surface with a hardening formulation that increases abrasion resistance each time it is applied. An alternative to conventional cleaners that contain harmful pH levels, phosphates, sodium hydroxides, and butyls that result in etching and gloss reduction. CleanMaintain w/Slip-Resist with GUnanoInside™ clarifies and reinforces as a part of the Green Umbrella LifeCycle™ Maintenance System.
