ColorDeep

DEEP COLOR &
DENSIFY IN ONE

DEEP SUBSURFACE / @EarlyAge™ NANO DYE, PH NEUTRAL DENSIFIER / BRILLIANT APPEARANCE

ARCHITECTURAL APPLICATIONS

Green Umbrella® ColorDeep is part of our CrossOver™ concrete treatments meeting Architectural Concrete design professionals' versatile product demands for an interior concrete colorant and densifier. ColorDeep™ basic use is a *Penetrating Interior Liquid Nano Dye Colorant and Penetrating Completely Reactive Hydrophilic Insoluble Nano Densifier*. Used in applications where basic densifiers and hardeners are specified but where an odorless, non-flammable application and high-performance concrete densifier is desired.

DEEP SUBSURFACE / @EarlyAge™ NANO DYE, PH NEUTRAL DENSIFIER / BRILLIANT APPEARANCE

GREEN UMBRELLA®
ColorDeep

Deep Color & Densify In One

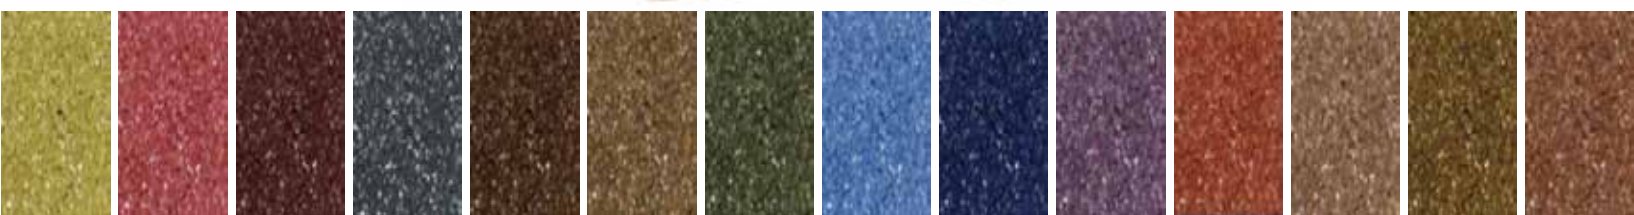

Green Umbrella® ColorDeep™ combines an environmentally formulated densifier with a nano formulated interior Nano-Dye™ to densify and color in a single step. A translucent, ph neutral dye utilizes nano-sized particulates to deeply penetrate the concrete, diving deep into the subsurface and bonding to promote a longer color floor life-cycle. ColorDeep™ is insoluble and completely reactive. A treatment designed for architectural concrete floors is highly abrasion-resistant, harder, denser, and deeper within concrete for a less porous surface. Formulated to be a Cross-Over™ treatment safe to install S.O.L.O.™ in any environment, odorless and non-solvent, non-flammable, place @Profile&Polish™, use @EarlyAge™ or @MatureAge™, in facilities under construction or occupied. ColorDeep™ produces a substrate that will stain less and wear longer, reducing maintenance frequency and extending the colored concrete's life cycle. In a single step, advance architectural concrete floor profile projects, by cutting labor, downtime and environmental impact.

SUPPORT

“Green Umbrella directs our clients toward an architectural concrete design that is Versatile, Sustainable, and Economical. A GOAL without a plan is simply a dream. Planning with proven products and methods enables our clients to design and build to highlight the versatile and sustainable features of architectural concrete floors. Our GOAL is to become our client’s source for architectural concrete consulting for every project, from start to finish.

Green Umbrella is ready to support by providing a plan, or specification, for the owner and design professional that makes your vision a reality.”
