

Green Umbrella™ ColorDeep is an environmentally friendly colorant that not only gives you beautifully colored concrete but also hardens and densifies at the same time. Green Umbrella™ ColorDeep deeply penetrates and chemically reacts with concrete to create a floor surface that is harder, denser and less porous. Green Umbrella™ ColorDeep is a superior hardener taking the color deep into the subsurface. Unlike other Color densifiers that have little hardening effect; Green Umbrella™ ColorDeep has superior abrasion resistance.

Green Umbrella™ ColorDeep colorants are color dyes with an industry superior color fastness. The combination of coloring and densifying saves you time and money. Designed for interior use where heavy abrasion resistance is needed.

SAFER FOR THE ENVIRONMENT

Green Umbrella™ ColorDeep is a responsible alternative for professionals concerned about the environmental impact of acid stains dyes. Unlike solvent based dyes or pigments Green Umbrella™ ColorDeep is non-flammable, alleviating the concern that sometimes comes with the use of certain carrying agents like acetone. Green Umbrella™ ColorDeep is compliant with all state VOC standards.

GREEN UMBRELLA COLORDEEP IS AN ENVIRONMENTALLY RESPONSIBLE PRODUCT

SUPERIOR FEATURES

- Deep Subsurface Penetration; Excellent for Abrasion Resistance
- Densify and Color in one step cutting labor and downtime
- Custom Colors options available
- Breathable surface
- Designed for use in an environmental, wet grinding process
- pH neutral & non-hazardous
- Superior stand alone concrete hardener
- Increases hardness below ¼ inch deep, while reducing porosity

EASY TO APPLY – QUICK TO CURE - SIMPLE TO MAINTAIN

Green Umbrella™ ColorDeep specially formulated for use in manufacturing & light assembly plants, warehouse/distribution centers, food service operations, retail stores & showrooms, parking decks, garages, airports, hospitals and any other areas where concrete surfaces are maintained. It can be used for indoor or outdoor concrete.
