INTEGRAL / @EarlyAge™ NATURAL IRON OXIDE / UV STABLE

GREENUMBRELLA®  
**ColorPac**

**THE 'IN' CONCRETE COLORANT** Green Umbrella® ColorPac™ integral colors are natural iron-oxide pigments that are permanent and UV stable—engineered to establish performance with even color appearance, stability, and durability in all @EarlyAge concrete placements. ColorPac™ is packaged with the concrete producer in mind in water-soluble bags. When used as an alternative to surface-applied colorants in architectural concrete floors applications saves downtime & labor during construction. Not only is ColorPac™ at an equal or lower cost, but expensive masking and overspray damage to finishes is eliminated. Life-cycle @occupany™ is much greater as a "In concrete" component compared to unpredictable surface colorants. Our color palette extends to over 30 colors with varying intensity options. It is recommended to use a wearguard to enhance surface color and protect surface. Green Umbrella® iron-oxide pigments are natural and made in the U.S.A., providing a solution for those concerned about conventional concrete colorants and environmental impact. ColorPac is fast becoming the "in" concrete for design professionals.
