

# CUTSHEET

SUBTOPICAL / HYBRID HARDENER-SEALER-COLORANT / QUICK REPAIR & ENHANCEMENT

## Concrete's Most Versatile System

Green Umbrella® ColorShield™ is an interior or exterior color densifier that creates a repairable color layer to seal interior open, profiled or honed concrete surfaces with a medium to a high gloss finish. First, the formulation penetrates deep in the subsurface to densify the floor. Next, it fills the subsurface upward with a colorant, lastly, as a subtopical with an interlocked protective colorguard and wearguard barrier that performs like a micro-finish sealer—uniquely formulated as a non-resinous polymer that is not prone to peeling. Combine with a choice of two Green Umbrella® colorants, NanoExterior™ for pigment for exterior applications, or combine with an interior NanoDye™ for a deep, even color. ColorShield™ forms a breathable, dense, maintainable, protective layer. ColorShield™ enhances and protects exposed concrete surfaces - with or without abrasive profiling or honing — extending life-cycle, promoting a clean appearance, with color while repelling potential contaminants, leaving the surface easy to clean, maintain and repair.

### VERSATILE ARCHITECTURAL APPLICATIONS

Ideal for **interior** or **exterior**, vertical or horizontal in Demanding Applications; Driveways, patios, sidewalks, pool decks, warehouse/distribution centers, food service, parking decks, garages, hospitals. Decorative Color Applications; retail spaces & showrooms, restaurants, offices, lobbies, museums, municipalities, airports, hospitals, schools, fire-stations, or most concrete surfaces.

### EASY TO INSTALL - SIMPLE TO MAINTAIN

ColorShield is combined with either NanoDye™ or NanoExternal™. Consulting instructions for Green Umbrella Fusion System. Apply S.O.L.O.<sup>1</sup> with a GU recommended sprayer for coverage up to 400 SF per gallon with broom or T-bar. To maintain, simply damp mop or auto scrub using Green Umbrella Life Cycle maintenance system treatments.

#### CUT LABOR

- Densifies and colors concrete in a single treatment
- Eliminate Acetone application
- No residue to scrub or remove

#### CUT DOWNTIME

- 1 hour dwell & dry time
- No residue to scrub or remove
- Eliminates colorant dry time

#### CUT ENVIRONMENTAL IMPACT

- Alternative for professionals conscience of environmental impact of acid stains, epoxies or flammability of carrying agent
- Product reduction
- No VOC

<sup>1</sup>Spray-On, Leave-On <sup>2</sup>Ready-To-Use

#### PACKAGING
