

Green Umbrella™ Dry Shield™ is an environmentally friendly concrete hardener or densifier that deeply penetrates and chemically reacts with concrete to create a floor surface that is harder, denser and less porous, while allowing for maximum penetration of concrete dyes. A clear, odorless solution, Green Umbrella Dry Shield does not require rinsing and removal, saving considerable time and money while eliminating hazardous waste disposal issues — significantly reducing your company's impact on the environment.

Green Umbrella Dry Shield is specially formulated for use in manufacturing & light assembly plants, warehouse/distribution centers, food service operations, retail stores & showrooms, parking decks, garages, airports, hospitals and any other areas where concrete surfaces are maintained.

SAFER FOR THE ENVIRONMENT

Green Umbrella Dry Shield is a responsible alternative for professionals concerned about the environmental impact of densifiers and other concrete treatments. Unlike many traditional products, Green Umbrella Dry Shield is pH-neutral, compliant with all state VOC standards, and contains no sodium or potassium which can contribute to Alkali Silica Reaction (ASR). The harder, denser and less porous surface created by Green Umbrella Dry Shield means the substrate will stain less and wear longer, reducing maintenance frequency and extending the life of concrete and masonry.

GREEN UMBRELLA DRY SHIELD IS AN ENVIRONMENTALLY RESPONSIBLE PRODUCT

SUPERIOR FEATURES

- Designed for environmental wet Grinding, Honing and Polishing
- pH neutral
- Will not form white residue that has to be recut
- Increases hardness and density, while reducing porosity
- Requires no rinsing & disposal and will not gel on surface
- Resists penetration by oils, chemicals and other stain-causing materials
- Decreases black tire marking from lift trucks and other equipment
- Stands up to heavy abrasion and foot traffic while providing excellent slip resistance
- Does not interfere with application of concrete dyes

EASY TO APPLY – SIMPLE TO MAINTAIN

Because of the reduced porosity Green Umbrella Dry Shield is used neat — no mixing required. Simply apply with a Green Umbrella recommended sprayer for coverage of up to 600 sq. ft. per gallon. Because of their reduced porosity and superior resistance to staining, maintaining surfaces treated with Green Umbrella Dry Shield requires nothing more than occasional damp mopping, auto scrubbing and periodical burnishing if desired.
