Power Trowel PHP Concrete Refinement

The Green Umbrella power trowel PHP (Profile Hone Polish) system enables contractors to successfully attract and accomplish larger jobs by drastically reducing the cost-per-square-foot of polished concrete.

The stacking of GU Trowel PHP and GU Concrete Systems enables quicker turnaround times with less labor. Ideal for large facilities, 5,000 square feet or more, power trowel grinding and polishing offers a cost-competitive solution that can reduce the processing time of a job that may have taken 10 days down to just three.

Average of 90% Labor Reduction

Traditional planetary 300-800 sqft/hr vs 10,000 sqft/hr with GU Trowel PHP and GU Concrete Systems.

A Big Payoff

Provide concrete refinement for large format facilities (warehouses, factories, convention centers).

Safer

Wet process eliminates risk of airborne silica hazard.

Renew Your Floor, Reduce Your Expense

-  Restore your floors, save time, save money.
-  Concrete wears like iron when renewed with Green Umbrella Systems.
-  Green Umbrella Systems produce all levels of gloss, stain resistance and colors.
