

**GREEN UMBRELLA™**

# Green DeepClean with Slip-Resist

**An environmentally friendly neutral pH cleaner engineered for concrete floors.**

Simply mopping up a spill may seem to take away the immediate problem. But as you may have often seen, some residue remains and is just spread around. Accumulation of residual oils and moisture promotes mildew and bacteria growth, resulting in health hazards, long term damage to the floor and an increased risk of slipping. **Green Umbrella™ Green DeepClean w/ Slip Resist** works different than other cleaners by strengthening the slab while removing oil and other deposits. A conditioning formula is absorbed into the slab, adding excellent slip resistance while restoring the floors luster. This results in less maintenance and a healthier, better looking concrete floor.

**Green Umbrella™ Green DeepClean w/ Slip Resist** was made for use in hand mopping equipment as well as for auto-scrubbers. Green Umbrella™ recommends this as your daily use cleaner in high traffic areas to see the maximum benefits in floor clarity and slip-resistance. This product may be used liberally with no risk of dulling the floor surface causing streaking or residue on cleaned surfaces. Using **Green Umbrella™ Green DeepClean w/ Slip Resist** on a regular basis will result in a cleaner and safer floor while reducing the annual cost of floor care.

## Features & Benefits

- Added Slip-Resistance
- pH Neutral
- Environmentally Friendly
- Quickly Releases Dirt and Oils
- Concentrated
- No-Rinse
- No Harmful Phosphates, Sodium Hydroxides, or Butyls
- Cost Effective
- Non-Damaging

## Applications

- Grocery Stores
- Polished Concrete
- Schools
- Residential
- Showrooms
- Industrial Floor Slabs

## SAFER FOR THE ENVIRONMENT

Green Umbrella™ Green DeepClean w/ Slip Resist is a responsible cleaner for professionals concerned about the environmental impact of the products they use. Green Umbrella™ strives to provide both excellent and sustainable products for the concrete industry.
