CURE&CAP SYSTEM

SUBTOPICAL & SUBSURFACE / CURE & WEARGUARD / POLISH CONCRETE LOOK

MOUNTAIN-LIKE PROTECTION " Green Umbrella GreenIce Cure & Cap™ System is an interior or exterior @EarlyAge integral concrete cure with a wear-guard. This three-part system utilizes a cure IceStart™, during finishing and fixative, IceStop™, immediately after troweling. IceCap™ is a sub-topical sealer that crosslinks to the GreenIce Cure to preserve the architectural concrete finish by preventing deterioration or contaminant penetration. Additionally, IceCap™ gives a high-gloss to the refined concrete surface for improved reflectivity and aesthetic appeal. GreenIce Cure & Cap results in an unconventional, consolidated, and refined surface that promotes best concrete practice improving edges and ff/fl numbers. @Finishing it works as a finishing aide— yet provides a cured, mechanically and chemically densified floor with the appearance of polished concrete look, all at the day of placement—cutting construction downtime considerably. GreenIce Cure & Cap will protect your concrete during construction if you choose to schedule the polished concrete for a later stage, removing the need for expensive floor protection*. The GreenIce Cure & Cap System brings industry-leading hardness, density, abrasion resistance while retaining the maximum amount of moisture within the concrete during curing for an unconventional architectural concrete floor that gives rock-solid protection.
