DEEP SUBSURFACE / WATER RESISTANT DENSIFIER / HIGHLY ABRASION RESISTANT

## GREEN UMBRELLA® HYDROSHIELD

### Filling the Voids & Resisting Water

Green Umbrella® HydroShield™ is an environmentally friendly concrete hardener and densifier. Reaching deep within the subsurface, HydroShield creates more than a conventional shell surface. The unique formulation is resistant to surface water and is insoluble, 100% reactive, and breathable at the surface—resulting in a bond within the concrete that is stronger, denser, and less porous. A clear, odorless solution specially formulated to be a CrossOver Densifier™. Designed for application @EarlyAge™, @Profile&Polish™, or @MatureAge™ concrete. Unlike conventional hardeners, HydroShield is a S.O.L.O™ (Spray-On, Leave-On) treatment that requires no scrubbing or mopping during a single application. HydroShield produces a substrate that will stain less and wear longer, reducing maintenance frequency and extending the concrete's life cycle.

Green Umbrella® HydroShield™ is an environmentally friendly concrete hardener and densifier. Reaching deep within the subsurface, HydroShield creates more than a conventional shell surface. The unique formulation is resistant to surface water and is insoluble, 100% reactive, and breathable at the surface—resulting in a bond within the concrete that is stronger, denser, and less porous. A clear, odorless solution specially formulated to be a CrossOver Densifier™. Designed for application @EarlyAge™, @Profile&Polish™, or @MatureAge™ concrete. HydroShield produces a substrate that will stain less and wear longer, reducing maintenance frequency and extending the concrete's life cycle.

### VERSATILE ARCHITECTURAL APPLICATIONS

Green Umbrella® HydroShield™ is specially formulated for use in manufacturing & light assembly plants, warehouse/distribution centers, food service operations, retail stores & showrooms, parking decks, garages, airports, hospitals, and wherever concrete surfaces are maintained. It can be used vertical or horizontal for indoor or outdoor concrete.

### EASY TO INSTALL - SIMPLE TO MAINTAIN

Green Umbrella® HydroShield is shipped R.T.U (Ready-To-Use), no mixing required. Simply apply with a Green Umbrella® recommended sprayer for coverage of 400-600 sq. ft. per gallon. Due to reduced porosity and superior resistance to staining, maintaining surfaces treated with HydroShield requires nothing more than occasional damp mopping, auto scrubbing and periodic burnishing if desired. Maintain using Green Umbrella® cleaning treatments.

#### CUT LABOR

- Densifies & resists water in a single treatment
- No scrubbing or agitation required during application
- S.O.L.O.™ application

#### CUT DOWNTIME

- 30 minute dwell time
- 1 hour to all traffic
- Optional same-day, after concrete placement, no 28-day application restriction

#### CUT ENVIRONMENTAL IMPACT

- Reduction of products
- Reduces porosity, increases life-cycle
- No VOC's

#### PACKAGING

5/PAIL

55/DRUM

275/TOTE
