

MAX

DEFENSE SYSTEM

CONCRETE FLOORS BEST GAME PLAN

SUPERIOR PERFORMANCE, MECHANICALLY PROFILED

PREVENTS CONCRETE OFF-DUSTING

HIGHLY ABRASION-RESISTANT

HYDRAULIC FLUID, SALT & STAIN RESISTANT

WATER-RESISTANT, WITH WEARGUARD

MAX DEFENSE SYSTEM

Green Umbrella Max Defense System™ wins a high-performance architectural concrete floor with products designed to play well together. Created for owners and design professionals who have experienced the failure of products that do not team well. A system for the success of interior polished concrete @MatureAge™. Using a GreenCut Abrasives System that includes a surface refinement cutting agent, GreenCut™. Profiled with the use of PowerTrowels or Grinders with production rates that seem unfair compared to the completion. Processed using selected GC abrasives - BigStock™, GC-X™, GC-Fusion™, GC Eraser™, and GCPolishPlus™ - to create a superior mechanical foundation defense with any specified class of profile or gloss.

The Max Defense System first covers the field with DryShield™, our highly abrasion-resistant flagship densifier that fills the concrete void. Shield & Enhance™ is next in the lineup to protect from salt with superior stain protection. Then bringing a fantastic finish with Interior Microfilm™, a repairable wear-guard that brings clarity to the profile. Max Defense promotes bonding and cross-linking within the concrete without the negative side-effect of ASR or topical de-lamination found with other products. Maintain with GreenClean™, a LifeCycle™ cleaner with densifier built in. All of this is "concrete's best game plan".

GreenCut™ is a *Neutral Nano Surface Profile Agent*. Used in applications where conventional laborious processing was specified but where a more refined surface and reduction in product treatment is desired.

DryShield™ is a *Penetrating Completely Reactive Hydrophilic Insoluble Nano Densifier* for interior or exterior. Green Umbrella's our flagship cross-over densifier DryShield for use in applications where a high-abrasion resistant and value-engineered treatment is needed.

Shield & Enhance™ basic use is a *Penetrating Completely Reactive Silane Modified Densifier* for interior or exterior. Used in applications where basic hardeners are specified but where a color guard that will prevent oxidation, not simply a color inhibitor—with the highest stain chloride intrusion, stain and salt protection, and high-performance concrete hardener is desired.

Interior Microfilm™ is a *Penetrating Reactive Interior Microfinish for Profiled Surfaces* for interior surfaces only. Used in applications where basic stain guards are specified but where a more permeant, reactive, and high-performance treatment is desired.

SYSTEM SPECIFICATION

GREENUMBRELLA
FULLSPEC

PROFILE TREATMENT		GREENCUT		
PROFILE	 	GC BIGSTOCK	GC X	GC FUSION
HONE	 	GC ERASER	GC FUSION	
DENSIFIER/HARDNER TREATMENT		DRYSHIELD		
POLISH	 	GC POLISH PLUS		
SALT TREATMENT		SHIELD & ENHANCE		
PENETRATING & REPAIRABLE SURFACE TREATMENT	 	INTERIOR MICROFILM
