SUBSURFACE / @EarlyAge™ NANO DYE COLORANT / BRILLIANT APPEARANCE

GREENUMBRELLA®

NanoDye

Dye that is Versatile to Apply

Green Umbrella® NanoDye™ concrete colorant is an interior, translucent, subsurface, pH neutral dye that utilizes nano-sized particulates to penetrate the concrete, depositing colorant embedded in the concrete subsurface, promoting a longer life-cycle. Due to this size, NanoDye™ has an rich, even and more complete appearance than conventional colorants. Intended for use @Profile&Polish within a treatment system or application on any indoor substrate with suitably prepared concrete. Combined with GreenUmbrella CrossOver™ densifiers, NanoDye™ may be installed @EarlyAge™ and in high humidity environments where other colorants do not perform well. @EarlyAge™ staging significantly Cuts Labor and Cuts Downtime. For applications like logos, multi-color patterns, or linear borders, or striping, mix with VOC compliant, non-acid Acetone for quick-to-dry installations. NanoDye™ offers more than fourteen colors with varied intensity and may even be introduced to concrete using water. A rich, deep, odorless, single-saturation color application colorant, extending colored concrete's life cycle with superior results. With so many options it is the "dye that is versatile to apply".

“GIVING YOU THE DIRECTION YOU NEED.”

INITIATIVE

INSIGHT

SPECIFICATION

“Green Umbrella starts by CONSULTANTS showing initiative. Design professionals, owners, and contractors need someone who is willing to take the initiative in connecting you with the solutions for sustainable concrete. We freely share industrial insight by investing in our industry with Continued Education Presentations created for the design professionals, general contractors, and craftsmen. We can assist you in understanding past project failures, helping you build your specifications for future success. With all the products needed on a project, it is essential to have someone “Giving the Direction you Need”.
