SURFACE & SUBSURFACE / REACTIVE GROUT / INSOLUBLE

GREENUMBRELLA®

# ProfileFil Plus+

## THE SLAB SAVER

Green Umbrella® ProfileFil Plus™ Green Umbrella's latest advancement in reactive grouting technology with GUnanoInside, for profiled floors.

Creating an invisible bond that improves surface strength. ProfileFil Plus's innovative bonding formula and colorant acceptance ensure a long-term solution for abrasively polished architectural concrete problemed floors. It is formulated to be non-polluting, environmentally safe, and quick curing grout. Introduced during the profiling process @MatureAge, it fills concrete micro-holes, micro-cracks, and even small aggregate roll-outs. Additionally, by closing off the surface, it allows for a highly reflective finish, if desired. ProfileFil Plus simply is "The Slab Saver" for damaged architectural concrete that could not be honed without surface grout, helping to lessen your environmental impact.
