

SUBTOPICAL / HYBRID DENSIFIER-HARDNER-REPELLANT / VALUE ENGINEERED

## GREEN UMBRELLA® **QuickRepel**

**Quick to Install Quick to Repel** GreenUmbrella® QuickRepel™ is an interior-exterior, insoluble hybrid, a nano-densifier treatment that provides deep unseen protection and yet with repellency as visible as water droplets on a rose petal. This ground-breaking, advanced formulation combines two types of concrete treatments: A deep subsurface densifier that floods and fills capillaries preventing concrete off-dusting; a fully reactive treatment resulting in a deep bond that provides a clarified gloss appearance. A valued engineered treatment can be used as a densifier, colorguard, and wearguard with a unique repellence to surface water—it beads; yet, it is breathable. QuickRepel™ is an R.T.U. advanced CrossOver™ treatment for application @EarlyAge™, @Profile&Polish™, or @MatureAge™ concrete with a single S.O.L.O.™<sup>1</sup> at post-polish making it a quick to install treatment cutting downtime substantially.

### VERSATILE ARCHITECTURAL APPLICATIONS

Ideal for **interior** or **exterior**, vertical or horizontal, Demanding Applications; warehouse/distribution centers, food service, parking decks, garages, hospitals, or similar & Decorative Concrete Applications; retail spaces & showrooms, restaurants, business offices, lobby areas, museums, municipalities, airports, hospitals, schools, fire-stations, or wherever concrete surfaces are maintained.

#### CUT LABOR

- S.O.L.O.<sup>1</sup> application and R.T.U.<sup>2</sup> treatment Repels water & densifies in one product
- No scrubbing or agitation required during application

#### CUT DOWNTIME

- 30 minute dwell time
- 3 hours to all traffic and any abrasive processing
- Fraction of time of flooring options

#### CUT ENVIRONMENTAL IMPACT

- Reduction of products
- Reduces porosity, increases life cycle
- No VOC's

<sup>1</sup>Spray-On, Leave-On <sup>2</sup>Ready-To-Use

#### EASY TO INSTALL - SIMPLE TO MAINTAIN

QuickRepel is shipped R.T.U.<sup>2</sup> Easily apply S.O.L.O.<sup>1</sup> with a GU recommended sprayer for coverage of 400-500 SF per gallon, in some applications spread with GU exploded-tip broom or T-Bar. To maintain, simply damp mop, auto scrub, and periodically burnish using Green Umbrella LifeCycle™ Maintenance System treatments.
