

GREENUMBRELLA™ Spec Data Sheet

Green Umbrella SafeDrum is a neutral pH concrete removing agent that reduces concrete build up. Applied to mix trucks, concrete finishing or polishing equipment GU SafeDrum helps to remove and prevent concrete build up. The rinse-free formula will not contaminate the concrete or affect the performance of the subsequent loads of concrete. When the concrete dries out the product stops working. Water is essential to the performance of GU SafeDrum. SafeDrum will not hurt or contaminate concrete that equipment comes in contact with.

GU SafeDrum is designed to initially remove concrete in truck drum at increased dosage or as part of a maintenance regiment. This cleanser will continue to remove and prevent build up even when equipment is in use. The regular use of SafeDrum will reduce concrete residue, time spent cleaning equipment and provide consistent levels of cleanliness, all while reducing your maintenance cost. As all of Green Umbrella Products. Cutting your Labor, Downtime and Environmental Impact.

Safer for the environment

GU SafeDrum has a neutral pH and safely removes concrete build up from mix trucks, power trowels, screeds, polishing equipment and any other tools used by mix plants, concrete and polishing contractors.

Superior Features

- Neutral pH
- Concentrated
- No Rinse Formula
- Cost Effective
- Safe Drum Cleaning without Worker Risk
- Not Harmful to Equipment or Concrete Mix
- Replacement for Laborious Cleaning

Easy-Quick-Simple

Instead of scraping or jackhammering concrete buildup off of equipment, GU SafeDrum naturally reacts with buildup to clean your equipment. Simply attach metered dispenser to a .75 inch water hose, rinse equipment of any loose materials with water and then depress button to dispense cleaner. Use 1/2 gallon a week on Truck Rinse to maintain a clean truck.
