

## SUBSURFACE / HYBRID ASTM C-309 MEMBRANE CURE & HARDENER / SINGLE APPLICATION

# GREEN UMBRELLA® SoloCure

### @EarlyAge™ Conventional Concrete (28 days or earlier):

SoloCure™ by Green Umbrella® of Rochester, NY (844) 200-7336 is an R.T.U.™ (Ready-to-Use), S.O.L.O.™ (Spray-On, Leave-On), water-based, membrane-forming curing compound and densifier that meets ASTM C-309. This S.O.L.O. formula can be applied on @EarlyAge slabs immediately after place and finish. 1. Before use, ALWAYS mix using a drill-powered paddle in negative action (top > down). 2. Using a clean, dry, non-metal, low-pressure, high-volume, manual or battery-powered commercial sprayer, spray at 200-600 SF per gallon. The coverage ratio will depend on the finish, broom or hard trowel. 3. Spray evenly without puddling. Allow for 30 minutes of wet dwell time for full saturation. Do not walk on or allow traffic for 2-3 hours or until dry. 4. Return later with an auto scrubber equipped with thick black pads or soft bristle brushes and Green Umbrella DeepClean w/SlipResist™ to clean and remove the film. 5. For added sheen and gloss, burnish clean surface using a concrete-weighted, ultra-high-speed propane burnisher equipped with a GreenGloss™ pad. ## WHAT DOES THAT MEAN?

### GREEN UMBRELLA® CONCRETE GLOSSARY

### Concrete Guides and TechNotes for Design Professionals

ACI (American Concrete Institute) guides are written by committee members with different perspectives from all facets of the industry and provide recommendations for analysis, design, specifying, selection, evaluation, testing, construction, and repair of concrete materials or structures. TechNotes are narrowly focused, single-topic guides, usually practice-oriented. A TechNote presents a specific direction on a particular issue and may contain pictures, figures, tables, and numeric examples. Many of the most beneficial areas on the Green Umbrella website are in the footer menu **Technical Notes** or **Concrete Guides** to help you **make the complex simple** from design to completion.

# ***“GIVING YOU THE DIRECTION YOU NEED.”***

**INITIATIVE**

**INSIGHT**

**SPECIFICATION**

Green Umbrella® starts with consultants showing initiative. Design professionals, owners, and contractors need someone willing to take the initiative in connecting you with solutions for sustainable concrete. We freely share industrial insight by investing in our industry with continued education presentations created for design professionals, general contractors, and craftsmen. We can assist you in understanding past project failures and helping you build your specifications for future success. With all the products needed for a project, it is essential to have someone *giving you the direction you need.*
